REPORT.

TO THE RIGHT HONOURABLE
JOHN SINCLAIR, M.P.,
His Majesty's Secretary for Scotland.

GENERAL REGISTRY OFFICE OF BIRTHS, &c.,
EDINBURGH, 25th March, 1908.

SIR,

I HAVE now the honour to submit to you, in accordance with the requirements of the Scottish Registration Act (17 & 18 Vict. cap. 80), a General Abstract of the Births, Deaths, and Marriages registered in Scotland during the year 1907, drawn up in the usual form, with a view to its being laid before Parliament.

I have also the honour to submit to you, in accordance with Section 19 of the Vaccination Act (26 & 27 Vict. cap. 108), the Forty-third Annual Report on Vaccination, which includes all the usual details relative to children whose Births were registered in Scotland during the year 1906.

I have the honour to be,

SIR,

Your most obedient Servant,

STAIR AGNEW,
Registrar-General.

REPORT TO THE REGISTRAR-GENERAL.

BY JAMES CRAUFURD DUNLOP, M.D., F.R.C.P. Edin.

SIR,

I HAVE the honour to submit the Fifty-third Annual Report regarding the Births, Deaths, and Marriages registered in Scotland. In it there are given facts concerning the births, deaths, and marriages registered in Scotland during the year ending 31st December 1907. Fuller information regarding those births, deaths, and marriages will be given in the Fifty-third Detailed Annual Report, which will be submitted at a later date.

I also submit the Forty-third Annual Report on Vaccination; in it is contained information regarding the administration of the Vaccination (Scotland) Acts, 1863 to 1907, more particularly regarding the vaccination of children whose births were registered in Scotland during the year ending 31st December 1906.

I.—BIRTHS, DEATHS, AND MARRIAGES IN SCOTLAND.

POPULATION.

The population of Scotland at the middle of the year 1907 is estimated to have been 4,776,063, of whom 2,331,907 were male, and 2,444,156 female. This estimate is 49,993 more than that of the population at the middle of the previous year, 1906, the increase of the male population being estimated at 26,057; and that of the female population at 23,936. These increases are based on the observed rates of increase observed in the last intercensal period, which rates are assumed to have continued. The natural increase of the population of Scotland during the year 1907, that is, the excess of births over deaths registered in that year, amounted to 51,522; the difference between that figure and the estimated increase may be taken as some indication of the probable effect of immigration and emigration of the population. The natural increase of the male population was 27,662, and of the female population 23,860.

Of the estimated population of Scotland, 2,178,036, or 45·60 per cent., are included in the estimated population of the Principal Town Districts, which are those towns which at the time of the last census had a population of over 30,000; 602,799, or 12·62 per cent., are included in the estimate of the Large Town Districts, which are registration districts containing towns with populations at the time of the last census of between 10,000 and 30,000; 963,536, or 20·17 per cent., are included in the estimated population of the Small Town Registration Districts, which are registration districts containing towns which at the time of the last census had populations of between 2000 and 10,000; 919,034, or 19·24 per cent., are included in the estimated population of the Mainland-Rural Registration Districts, which consist of the portions of the mainland of Scotland not included in the above; and 112,658, or 2·36 per cent., are included in

the estimated population of the Insular-Rural Registration Districts, which are those portions of the islands of Scotland not included in the above. The estimated population of the Principal Town Districts is 34,984 more than that of the previous year, that of the Large Town Districts is 6606 more, and that of the Small Town Districts 10,019 more; but that of the Mainland-Rural Districts is 984 less, and that of the Insular-Rural Districts 632 less.

TABLE I.—Population estimated to the middle of each year, with the Number of Births, Deaths, and Marriages registered in Scotland during each of the Years 1855 to 1907, and their Proportion to the Population; also the Excess of Births over Deaths, the Number of Illegitimate Births, and their Proportion to the Total Births.

| YEAR. | Estimated Population. | BIRTHS. | | DEATHS. | MAR-RIAGES. | Excess of Births over Deaths. | Rate per 1000 of Population. | | | Percent. of Illeg. to Total Births. |
|-------|-----------------------|---------|----------|---------|-------------|-------------------------------|------------------------------|---------|------------|-------------------------------------|
| | | Total. | Illegit. | | | | Births. | Deaths. | Marriages. | |

BIRTHS.

The outstanding feature of the year concerning the statistics of births in Scotland is a marked lowering of the birth-rate. In the Fifty-second Annual Report attention was directed to the fact that in that year, 1906,

the birth-rate was the lowest recorded for Scotland since the institution of national registration. The birth-rate of this year is lower than that of 1906, and is the actual lowest yet recorded.

The total number of births of living children registered in Scotland during 1907 was 128,789, a number which is 3131 less than that of the births registered in the previous year, 1906, 3556 less than the average annual number of births registered during the previous five years, and 2790 less than the average annual number of births registered during the previous ten years. Of these births 59,302 were registered in the Principal Town Districts, 18,355 in the Large Town Districts, 26,930 in the Small Town Districts, 21,996 in the Mainland-Rural Districts, and 2206 in the Insular-Rural Districts. Compared with the number of births registered in those groups of registration districts, the number of births in each of the groups shows a diminution. The births registered in the Principal Town Districts are 1184 fewer than in the previous year, those registered in the Large Town Districts 77 fewer, in the Small Town Districts 716 fewer, in the Mainland-Rural Districts 1053 fewer, and in the Insular-Rural Districts 101 fewer than in that year.

The birth-rate of the year 1907 was 26·97, and, as above stated, is the lowest yet recorded for Scotland. It is 0·94 lower than the birth-rate of 1906, 1·64 less than the mean of the birth-rates of the previous five years, and 2·23 less than the mean of the birth-rates of the previous ten years. From 1855 to 1893 the birth-rate of Scotland ranged between 30 and 35·6 per thousand, between 1894 and 1903 it ranged between 29 and 30, in 1904 and 1905 it was between 28 and 29, in 1906 it, for the first time, fell below 28, and this year, for the first time, has fallen below 27 per thousand. The birth-rate of the year in the Principal Town Districts was 27·2, in the Large Town Districts 30·4, in the Small Town Districts 27·9, in the Mainland-Rural Districts 23·9, and in the Insular-Rural Districts 19·6. The birth-rate in each of these groups of registration districts is lower than it was in 1906; in the Principal Town Districts it is 1·0 lower, in the Large Town Districts 0·5 lower, in the Small Town Districts 1·1 lower, in the Mainland-Rural Districts 1·2 lower, and in the Insular-Rural Districts 0·8 lower. Thus the fall of the birth-rate has not been due to a fall of the birth-rate in any one group of districts, but has been common to all.

Of the 128,789 births registered in Scotland during the year, 2230 were registered in the Northern Division of the counties, 3327 in the North-Western Division, 12,257 in the North-Eastern Division, 17,250 in the East-Midland Division, 10,730 in the West-Midland Division, 61,678 in the South-Western Division, 17,254 in the South-Eastern Division, and 4063 in the Southern Division. The birth-rate in these divisions of the counties ranged from 29·8 in the South-Western to 20·5 in the Northern. In the West-Midland it was 28·2; in the North-Eastern, 25·7; in the East-Midland, 25·1; in the South-Eastern, 24·5; in the Southern, 21·7; and in the North-Western, 20·6. The birth-rate of the Southern Division is 1·6 lower than the birth-rate of the division in 1906; that of the South-Eastern is 1·3 lower; of the South-Western, 1·1 lower; of the North-Western and North-Eastern, 1·0 lower; of the Northern and East-Midland, 0·7 lower; while the birth-rate of the West-Midland Division is 0·1 higher than in the previous year. The recorded decline of the birth-rate is thus not only common to all the groups of registration districts, but also, West-Midland Division excepted, common to all the geographical divisions of the counties.

Illegitimate births registered during the year numbered 8342, and amounted to 6·48 per cent. of the total births. These births are 553 fewer than they were in 1906, 374 fewer than the average yearly number registered during the previous five years, and 348 fewer than the average annual number during the previous ten years. The percentage of the total births which were illegitimate is 0·26 less than the corresponding percentage of the previous year, 0·11 less than the mean of the percentages of the five previous years, and 0·13 less than the mean of the percentages of the previous ten years. The illegitimate birth-rate ranged from 8·5 per cent. of the total births in the Mainland-Rural Registration Districts to 5·1 per cent. in the Large Town Districts. In the Principal Town Districts it was 6·5, in the Insular-Rural Districts 5·8, and in the Small Town Districts 5·7. In the Insular-Rural Districts this rate is the same as in the previous year, but in each of the other groups of registration districts it is lower than in that year. In the divisions of the counties this rate ranged from 12·1 in the North-Eastern to 4·7 in the West-Midland. In the Southern it was 10·5; in the East-Midland, 6·7; in the South-Eastern, 6·5; in the Northern, 6·4; in the North-Western, 6·3; and in the

South-Western, 5·4. In the North-Eastern and North-Western Divisions this rate is higher than in the previous year; in the South-Eastern it is the same as in that year; in the Northern, East-Midland, West-Midland, South-Western, and Southern Divisions it is less than in the previous year.

In the counties the frequency of illegitimacy ranged from 14·4 in Elgin, 12·7 in Wigtown, 12·3 in Kirkcudbright, 12·2 in Aberdeen, 11·9 in Banff, and 11·1 in Nairn; to 3·4 in Shetland, 3·5 in Dumbarton, 4·2 in Ross and Cromarty, 4·3 in Sutherland, 4·3 in Renfrew, and 4·3 in Linlithgow. In 7 counties the illegitimate rate was more than 10 per cent., in 18 counties it was between 5 and 10 per cent., in 8 counties it was less than 5 per cent. The largest increases of county illegitimate rates as compared with the previous year are in Kirkcudbright, where the increase is 1·7; in Peebles, where the increase is 1·6; and in Nairn and Kincardine, where the increases are 1·4. The greatest diminutions of the rate as compared with that of the previous year are in Shetland and Sutherland, where the rate is 1·6 less than in 1906; in Argyll and in Dumfries, where it is 1·4 less; in Elgin, where it is 1·3 less; and in Banff, where it is 1·0 less.

Of the total children whose births were registered during the year, 65,929 were male, and 62,860 female. The proportion of male to female

births was thus 104·88 to 100. The birth-rate of males was 28·3 per thousand of the estimated male population, and that of females 25·7 per thousand of the estimated female population. Both these rates are less than in 1906.

The birth-rate of the first quarter of the year was 26·8, that of the second quarter 29·0, of the third quarter 26·1, and of the fourth quarter 26·1.

The average daily number of births registered throughout the year was 353. This average in April was 395; in May, 378; in July, 368; in June, 365; in January, 357; in October, 352; in February, 348; in March, 345; in December, 342; in August, 332; in November, 328; and in September, 325.

DEATHS.

The total number of deaths registered in Scotland during the year 1907 was 77,267, a number which is 1682 more than the number of deaths registered in the previous year, 1906, 858 more than the average number of deaths registered during the previous five years, but 891 fewer than the average number of deaths registered during the previous ten years. Of these deaths, 36,602, or 47·4 per cent., were registered in the Principal Town Districts; 10,037, or 13·0 per cent., in the Large Town Districts; 14,692, or 19·0 per cent., in the Small Town Districts; 14,123, or 18·3 per cent., in the Mainland-Rural Districts; and 1813, or 2·3 per cent., in the Insular-Rural Districts. The deaths registered in the Principal Town Districts are 1089 more than those registered in the previous year; those registered in the Mainland-Rural Districts, 265 more; in the Small Town Districts, 245 more; in the Insular-Rural Districts, 98 more; but in the Large Town Districts, 15 fewer than in that year.

The death-rate of the year was 16·18 per thousand of the estimated population, a rate which is 0·19 more than that of the previous year, 1906, but is 0·34 less than the mean of the death-rates of the previous five years, and 1·18 less than the mean of the death-rates of the previous ten years. The death-rates of the groups of registration districts ranged from 16·8 in the Principal Town Districts to 15·2 in the Small Town Districts. In the Large Town Districts it was 16·7, in the Insular-Rural Districts 16·1, and in the Mainland-Rural Districts 15·4. In the Small Town Districts the death-rate is the same as that of the previous year, in the Insular-Rural Districts it is 1·0 higher than in that year, in the Mainland-Rural Districts 0·3 higher, and in the Principal Town Districts 0·2 higher; but in the Large Town Districts it is 0·2 less than in that year.

In the divisions of the counties the death-rate ranged from 16·7 in the South-Western to 14·8 in the North-Eastern. In the Northern, North-Western, and Southern Divisions the death-rate was 16·5; in the West-Midland it was 16·0; in the East-Midland it was 15·9; and in the South-Eastern, 15·8. In the Northern and North-Western Divisions the death-rate was 0·7 higher than in the previous year, 1906; in the North-Eastern Division, 0·5 higher; in the South-Western Division, 0·2 higher; and in the South-Eastern and East-Midland, 0·1 higher; while in the Southern Division it was the same as in the previous year, and in the West-Midland it was 0·3 lower than in that year.

Of the 77,267 deaths registered, 38,267 were of males and 39,000 of females. The male deaths are 531 more than in the previous year, the female deaths 1151 more than in that year. The male death-rate was 16·4

per thousand of the estimated male population for the year, and the female death-rate 16·0 per thousand of the female population; the former is the same as the male death-rate of the previous year, but the latter is 0·4 higher than the female death-rate of that year.

The death-rate of the first quarter was 19·2; that of the second quarter, 16·9; of the third quarter, 13·1; and of the fourth quarter, 15·6. That of the first quarter is 1·6 more than the death-rate of the first quarter of the previous year, but is 0·5 less than the mean of the death-rates of the first quarter of the previous ten years. The death-rate of the second quarter is 0·5 more than that of the second quarter of the previous year, but 0·7 less than the mean of the death-rates of the second quarter of the previous ten years. The death-rate of the third quarter is 0·7 less than that of the previous year, 2·2 less than the mean of the death-rates of the third quarter of the previous ten years, and is the lowest death-rate for any quarter yet recorded for Scotland. The death-rate of the fourth quarter is 0·7 less than that of the fourth quarter of the previous year, and 1·2 less than the mean of the death-rates of the fourth quarter of the previous ten years.

The daily average number of deaths registered during the year was 212; that average in February was 262; in January, 254; in April, 246; in March, 239; in December, 236; in May, 223; in November, 198; in June, 194; in July, 187; in October, 178; in September, 163; and in August, 162.

MARRIAGES.

Marriages registered in Scotland during the year 1907 numbered 33,260, which is 137 more than the number registered in the previous year, 1906, 1074 more than the average annual number registered during the previous five years, and 1170 more than the average number registered annually during the previous ten years. Of these marriages, 17,950, or 54·0 per cent., were registered in the Principal Town Districts; 4385, or 13·2 per cent., were registered in the Large Town Districts; 6216, or 18·7 per cent., in the Small Town Districts; 4370, or 13·1 per cent., in the Mainland-Rural Districts; and 339, or 1·0 per cent., in the Insular-Rural Districts. The marriages registered in the Small Town Districts are 258 more than in the previous year, those registered in the Mainland-Rural Districts are 24 more, and those in the Large Town Districts 13 more; but those registered in the Principal Town Districts are 139 fewer, and those in the Insular-Rural Districts 19 fewer.

The marriage-rate of the year was 6·96 per thousand of the estimated population, a rate which is 0·05 less than that of the previous year, 1906, but 0·01 higher than the mean of the rates of the previous five years, and 0·16 more than the mean of the marriage-rates of the previous ten years. In the Principal Town Registration Districts the marriage-rate of the year was 8·2, which is 0·2 less than that of the previous year; in the Large Town Districts it was 7·3, which is the same as the rate of the previous year; in the Small Town Districts it was 6·5, which is 0·3 more than the rate of the previous year; in the Mainland-Rural Districts it was 4·8, which is 0·1 more than the rate of the previous year; and in the Insular-Rural Districts it was 3·0, which is 0·1 less than the marriage-rate of the previous year.

In the Northern Division of the counties marriages registered during the year numbered 454, and the marriage-rate was 4·2; in the North-

Western Division of the counties the marriages numbered 660, and the marriage-rate was 4·1; in the North-Eastern Division of the counties the number was 3031, and the rate 6·3; in the East-Midland Division the number was 4627, and the rate 6·7; in the West-Midland Division the number was 2208, and the rate 5·8; in the South-Western Division the number was 15,691, and the rate 7·6; in the South-Eastern Division the number was 5398, and the rate 7·7; in the Southern Division the number was 1191, and the rate 6·4. In the West-Midland and Southern Divisions the marriage-rate is the same as in the previous year; in the North-Eastern, East-Midland, and South-Eastern it is higher; but in the Northern, North-Western, and South-Western it is lower than in the previous year.

The average number of marriages registered daily during the year was 91. That average in June was 157; in July, 146; in December, 128; in January, 117; in April, 104; in September, 84; in October, 68; in November, 68; in February, 63; in August, 63; in March, 61; and in May, 33. As in the previous year, marriages in June were the most numerous and those in May the least numerous.

II.—BIRTHS, DEATHS, AND MARRIAGES IN EIGHT OF THE PRINCIPAL TOWNS OF SCOTLAND.

The following remarks refer to the births, deaths, and marriages in eight of the Principal Towns, namely:—Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth. The information on which the statements are founded is compiled from returns furnished weekly by the registrars of these towns, and similar information regarding the deaths registered elsewhere in Scotland is not yet available, but when available will be incorporated in the Detailed Annual Report which deals with the births, deaths, and marriages of the year now under consideration. As nearly 38 per cent. of the total population of Scotland live in these eight towns, it is reasonable to assume that the causes of death found to have been prevalent in them are an indication of the causes of death prevalent generally throughout Scotland during the year.

BIRTHS IN THE EIGHT TOWNS.

Births registered in these eight towns during the year numbered 48,131, and as the population of the eight towns at the middle of the year is estimated to have been 1,812,171, that number is equivalent to an annual birth-rate of 26·6 per thousand. These births are 1045 fewer than those registered in the previous year, 1628 fewer than the average number registered during the previous five years, and 1525 fewer than the average number registered during the previous ten years. The birth-rate is the lowest yet recorded for these towns; it is 0·9 less than that of 1906, which was previously the lowest; it is 2·2 less than the mean of the birth-rates of the previous five years, and 3·2 less than the mean of the birth-rates of these towns during the previous ten years.

Of the eight towns, Greenock had the highest birth-rate, 30·3, and Edinburgh the lowest, 21·7. In Glasgow the birth-rate of the year was 28·3; in Leith, 27·6; in Dundee, 27·4; in Paisley, 26·2; in Aberdeen, 25·8; and in Perth, 22·6. In Dundee and Paisley the birth-rate was the

same as in the previous year; in Perth it was 0·3 higher; but in Greenock it was 1·9 lower; in Aberdeen, 1·7 lower; in Leith, 1·4 lower; in Glasgow, 1·1 lower; and in Edinburgh, 0·7 lower.

Of the 48,131 births registered in these eight towns during the year, 3428, or 7·1 per cent., were illegitimate. This illegitimate rate is 0·1 less than the rate of the previous year, but is 0·2 more than the mean of the rates of the previous five years, and 0·3 more than the mean of the rates of the previous ten years. The illegitimate rate of the year was highest in Aberdeen, 9·8, and lowest in Leith, 4·4. In Dundee it was 9·2; in

TABLE VII.—Births, Deaths, and Marriages, and their Proportion to the Population, in Eight Principal Towns of Scotland, during each of the Years 1855–1907.

| YEARS. | Population estimated to the middle of each Year. | BIRTHS. | | | DEATHS. | | MARRIAGES. | |
|--------|--|---------|------------------------------|-----------------------------|---------|------------------------------|------------|------------------------------|
| | | Number. | Rate per 1000 of Population. | Percent'ge of Illegitimate. | Number. | Rate per 1000 of Population. | Number. | Rate per 1000 of Population. |
| 1855 | 827,558 | 28,113 | 33·9 | 7·5 | 22,706 | 27·4 | 6,937 | 8·4 |

| 1896 | 1,530,503 | 48,706 | 31·8 | 7·9 | 28,877 | 18·9 | 14,094 | 9·2 |
| 1897 | 1,565,188 | 48,949 | 31·3 | 7·0 | 32,824 | 21·0 | 14,484 | 9·3 |
| 1898 | 1,586,479 | 49,861 | 31·4 | 6·9 | 32,153 | 20·3 | 14,836 | 9·4 |
| 1899 | 1,608,080 | 49,753 | 30·9 | 6·6 | 32,430 | 20·2 | 15,378 | 9·6 |
| 1900 | 1,630,444 | 49,978 | 30·7 | 6·8 | 33,363 | 20·5 | 15,200 | 9·3 |
| 1901 | 1,656,648 | 49,237 | 29·7 | 6·6 | 33,351 | 20·1 | 14,573 | 8·8 |
| 1902 | 1,679,923 | 49,061 | 29·7 | 6·6 | 31,886 | 19·0 | 15,129 | 9·0 |
| 1903 | 1,702,912 | 50,697 | 29·8 | 6·6 | 30,863 | 18·1 | 15,074 | 8·9 |
| 1904 | 1,726,236 | 49,648 | 28·8 | 6·9 | 31,769 | 18·4 | 14,814 | 8·6 |
| 1905 | 1,749,917 | 49,313 | 28·2 | 7·1 | 29,967 | 17·1 | 14,454 | 8·3 |
| 1906 | 1,787,788 | 49,176 | 27·5 | 7·2 | 30,573 | 17·1 | 15,524 | 8·7 |
| 1907 | 1,812,171 | 48,131 | 26·6 | 7·1 | 31,632 | 17·5 | 15,461 | 8·5 |

Edinburgh, 7·9; in Perth, 7·0; in Glasgow, 6·7; in Paisley, 4·9; and in Greenock, 4·6. In Edinburgh this rate is the same as it was in the previous year; in Glasgow, Greenock, and Perth it is less than in that year; but in Dundee, Aberdeen, Paisley, and Leith it is higher than in that year.

The number of unmarried and widowed women of child-bearing age, 15 to 45, in the eight towns is estimated to have been 279,546 at the middle of the year; and as the number of illegitimate children born was 3428, the illegitimate birth-rate per thousand unmarried women amounted to 12·3, which is 0·6 less than the corresponding rate of the previous year. This rate ranged from 16·9 in Aberdeen to 8·1 in Paisley. In Dundee it was 14·5; in Glasgow, 13·2; in Greenock, 10·7; in Leith, 9·7; in Edinburgh, 9·3; and in Perth, 9·2.

DEATHS IN THE EIGHT TOWNS.

Deaths registered in the eight towns during the year 1907 numbered 31,632, and the death-rate of the eight towns combined was 17·5. The deaths of the year are 1059 more than those of the previous year, 1906, 620 more than the average number registered during the previous five years, but 286 less than the average number registered during the last ten years. The death-rate is 0·4 higher than that of the previous year, 1906, but is 0·4 less than the mean of the death-rates of the previous five years, and 1·7 less than the death-rate of the previous ten years. Previous to 1902 the death-rate in these eight towns was in only three years below 20 per thousand; in 1902, 1903, and 1904 it was between 18 and 20 per thousand; but the rate has now for three consecutive years been below 18 per thousand.

Of these towns Dundee had the highest death-rate, 19·1, and Aberdeen the lowest, 14·3. The death-rate in Glasgow was 18·5; in Perth, 17·9; in Greenock, 17·8; in Leith, 16·6; in Edinburgh, 16·2; and in Paisley, 16·1. In Dundee, Aberdeen, and Greenock the death-rate was lower than in

TABLE VIII.—Births, Deaths, and Marriages registered during 1907, and their Proportion to the Estimated Population, in Eight of the Principal Towns of Scotland; Estimated Number of Unmarried Women and Widows between 15 and 45 years of age; and the Illegitimate Births, and their Proportion to the Total Births, and to the Number of Possible Mothers.

| TOWNS. | Population estimated to the middle of 1907. | BIRTHS. | | Unmarried Women and Widows between 15 and 45. | ILLEGIT. BIRTHS. | | | DEATHS. | | MARRIAGES. | |
|-----------------|---|----------|---------------------------|---|------------------|----------------------------|------------------------------------|----------|---------------------------|------------|---------------------------|
| | | Num-ber. | Rate per 1000 of the Pop. | | Num-ber. | Per cent. of Total Births. | Rate per 1000 of Possible Mothers. | Num-ber. | Rate per 1000 of the Pop. | Num-ber. | Rate per 1000 of the Pop. |
| Glasgow . . . | 847,584 | 24,006 | 28·3 | 121,426 | 1,606 | 6·7 | 13·2 | 15,659 | 18·5 | 7,501 | 8·8 |
| Edinburgh . . . | 345,747 | 7,506 | 21·7 | 63,231 | 591 | 7·9 | 9·3 | 5,587 | 16·2 | 3,078 | 8·9 |
| Dundee . . . | 165,748 | 4,543 | 27·4 | 29,012 | 420 | 9·2 | 14·5 | 3,171 | 19·1 | 1,369 | 8·3 |
| Aberdeen . . . | 174,579 | 4,501 | 25·8 | 26,213 | 442 | 9·8 | 16·9 | 2,505 | 14·3 | 1,473 | 8·4 |
| Paisley . . . | 88,710 | 2,324 | 26·2 | 14,010 | 114 | 4·9 | 8·1 | 1,426 | 16·1 | 715 | 8·1 |
| Leith . . . | 83,668 | 2,306 | 27·6 | 10,430 | 101 | 4·4 | 9·7 | 1,393 | 16·6 | 547 | 6·5 |
| Greenock . . . | 71,269 | 2,156 | 30·3 | 9,263 | 99 | 4·6 | 10·7 | 1,267 | 17·8 | 490 | 6·9 |
| Perth . . . | 34,866 | 789 | 22·6 | 5,961 | 55 | 7·0 | 9·2 | 624 | 17·9 | 288 | 8·3 |

the previous year, but in the remaining five towns it was higher than in that year. The Leith death-rate of the year was the same as the mean of the death-rates of the previous ten years, but the rates of the other seven towns were all less than that mean.

When the death-rates of these eight towns are corrected for the sex and age distribution of the population, it is found that Glasgow has the highest corrected death-rate, 20·5, and Aberdeen the lowest, 14·2. The corrected death-rate of Dundee was 20·1; of Greenock, 18·7; of Perth, 18·0; of Leith, 17·6; of Edinburgh, 16·9; and of Paisley, 16·8.*

Deaths in the eight towns of children of less than one year old numbered 6177; the births in these towns during the year numbered 48,131, and thus the infantile mortality-rate of the towns amounted to 128 per thousand births, a rate which is 2 less than that of the previous year, and 1 less than that of 1905. The infantile mortality-rate of the year was highest in Dundee, 150, and lowest in Greenock, 104. In Glasgow it was 130; in Edinburgh, 127; in Aberdeen, 124; in Paisley, 121; in Leith,

TABLE IX.—Death-rate per 1000 of the Population in each of Eight of the Principal Towns of Scotland during each of the Years 1897–1907.

| Towns. | Death-rate per 1000 of the Population in | | | | | | | | | | |

| Perth | 3,524 | 141 | 40·0 | 22·6 |

* For Factors for Correction, see 51st Detailed Annual Report, page lxxi.

121; and in Perth, 110. Compared with the infantile mortality-rate of the previous year, that of Greenock is 23 less, that of Dundee 20 less, that of Aberdeen 4 less, and that of Glasgow 1 less; but the rate of Paisley is 7 more, of Leith 7 more, of Edinburgh 9 more, and of Perth 11 more. The infantile mortality-rate of Greenock for the year is the lowest yet recorded for that town, the previous lowest being 106 in 1888. In Glasgow, in one year only has a lower infantile mortality-rate been recorded, that year being 1878, when the rate was 127.

The deaths of children of less than one year old constituted 22·2 per cent. of the total deaths in Aberdeen, 21·5 per cent. in Dundee, 20·0 in Leith, 19·9 in Glasgow, 19·7 in Paisley, 17·8 in Greenock, 17·0 in Edinburgh, and 13·9 in Perth.

Deaths of children of less than five years old numbered 10,834; they constituted 34·3 per cent of the total deaths, and are equivalent to a death-rate of 51·7 per thousand of the estimated number of children of those ages. The number of these deaths is 532 more than in the previous year, and this death-rate is 1·8 higher than in that year. This death-rate for the year ranged from 60·8 in Dundee to 37·8 in Aberdeen. In Glasgow it was 57·2; in Greenock, 49·8; in Leith, 47·9; in Paisley, 45·9; in Edinburgh, 44·2; and in Perth, 40·0.

Deaths from the principal infectious diseases, namely, small-pox, measles, scarlet fever, influenza, hooping-cough, diphtheria, and "fevers," numbered 3882, and the death-rate from these causes was 215 per 100,000. The number of these deaths is 1615 more than in the previous year, and this death-rate is 87 per 100,000 higher than in that year. The death-rate from these causes ranged from 279 in Glasgow to 103 in Aberdeen. In Leith it was 230; in Dundee, 199; in Paisley, 193; in Greenock, 186; in Edinburgh, 145; and in Perth, 109. With the exception of that of Aberdeen, these rates are all higher than those of 1906. In Leith it was 138 higher; in Glasgow, 120; in Greenock, 111; in Paisley, 93; in Dundee, 71; in Edinburgh, 55; and in Perth, 30; while in Aberdeen it was 12 lower.

There was only one death from small-pox in these towns during the year. It was registered in Leith. In the previous year, 1906, there were no deaths from small-pox in these towns.

TABLE XA.—Infantile Mortality in Eight of the Principal Towns of Scotland during the Year 1907.

| TOWNS. | Births in 1907. | Deaths of Infants under 1 year of age. | | |
|---------------------|-----------------|--|-----------------------|-----------------------------|
| | | Number. | Rate per 1000 Births. | Percentage of Total Deaths. |
| Glasgow | 24,006 | 3,116 | 130 | 19·9 |
| Edinburgh | 7,506 | 952 | 127 | 17·0 |
| Dundee | 4,543 | 681 | 150 | 21·5 |
| Aberdeen | 4,501 | 557 | 124 | 22·2 |
| Paisley | 2,324 | 281 | 121 | 19·7 |
| Leith | 2,306 | 278 | 121 | 20·0 |
| Greenock | 2,156 | 225 | 104 | 17·8 |
| Perth | 789 | 87 | 110 | 13·9 |

Deaths from measles numbered 730, which is 10 fewer than in 1906, and is equivalent to a death-rate of 40 per 100,000. This death-rate ranged from 85 in Dundee to 11 in Paisley. In Greenock it was 52; in Glasgow, 47; in Leith, 35; in Edinburgh, 22; in Aberdeen, 20; and in Perth, 17.

Deaths from scarlet fever numbered 106; they are 26 fewer than in the previous year, and are equal to a death-rate of 6 per 100,000, a rate which is 1 less than that of the previous year. This death-rate ranged from 10 in Greenock to 0 in Perth. In Paisley it was 9; in Edinburgh, 7; in Dundee, 7; in Leith, 6; in Glasgow, 5; and in Aberdeen, 3.

Deaths attributed to influenza numbered 185; they are 15 more than in the previous year, and are equal to a death-rate of 10 per 100,000, a rate which ranged from 17 in Paisley to 8 in Glasgow.

Deaths from hooping-cough numbered 1404; they are 782 more than in the previous year, and the death-rate from that cause amounted to 78 per 100,000, a rate which is 43 higher than that of the previous year. Of these deaths, 888 were recorded in Glasgow and 167 in Edinburgh. The death-rate from this cause ranged from 106 in Glasgow to 48 in Edinburgh

TABLE XI.—Deaths from different Diseases in each of Eight of the Principal Towns of Scotland in 1907.

| DISEASES CAUSING DEATH. | Total Eight Towns. | Glasgow. | Edinburgh. | Dundee. | Aberdeen. | Paisley. | Leith. | Greenock. | Perth. |

*Smallpox, Measles, Scarlet Fever, Influenza, Hooping-cough, Diphtheria, and "Fevers."

and Aberdeen. In Greenock this rate was 69; in Paisley, 65; in Perth, 63; in Dundee, 55; and in Leith, 54.

Diphtheria was the ascribed cause of 284 deaths, a number which is 15 less than in the previous year, and equal to a death-rate of 16 per 100,000, a rate which is 1 less than that of the previous year. This death-rate ranged from 47 in Paisley to 10 in Edinburgh. In Dundee it was 18; in Greenock, 17; in Glasgow, 16; in Perth, 14; in Aberdeen, 12; and in Leith, 11.

Deaths in the eight towns from "fevers" numbered 1172; of them 5 were due to typhus fever, of which 2 were in Glasgow and 3 in Greenock; 146 were due to enteric fever, 1018 to cerebro-spinal meningitis, and 3 to ill-defined fever. The death-rate from "fevers" amounted to 65 per 100,000, a rate which is 48 more than in the previous year, an increase almost entirely due to the existence of an epidemic of cerebro-spinal meningitis in the towns.

Deaths from enteric fever numbered 146; they are 5 more than in the previous year, and are equal to an annual death-rate from that cause of 8 per 100,000, a rate which is the same as in the previous year. This rate ranged from 12 in Glasgow and 11 in Greenock, to 0 in Perth and 3 in Edinburgh and Dundee.

| Old Age | 41 | 34 | 45 | 48 | 47 | 56 | 25 | 52 | 89 |

Deaths ascribed to cerebro-spinal meningitis during the year in the eight towns numbered 1018; they are 862 more than in the previous year, and are equal to a death-rate of 56 per 100,000, a rate which is 47 more than that of last year. The course of the epidemic as shown by death returns is to be seen in Table XIII. In January in the eight towns 74 deaths from cerebro-spinal meningitis were registered, in February 140, in March a maximum number of 179 were recorded, after which month they declined, falling to 177 in April, 143 in May, 82 in June, 61 in July, 48 in August, 44 in September, 29 in October, 21 in November, and 20 in December. The monthly death-rate from this disease in January was 48 per 100,000. It rose till April, when it attained a maximum of 119, and then fell steadily till December, when it was 13. Of the 1018 deaths, 711 were registered in Glasgow, 148 in Edinburgh, 86 in Leith, 30 in Dundee, 30 in Paisley, 9 in Greenock, 3 in Aberdeen, and 1 in Perth. The death-rate from this cause ranged from 103 in Leith to 2 in Aberdeen. In Glasgow it was 85, in Edinburgh 43, in Paisley 34, in Dundee 18, in Greenock 13, and in Perth 3. Of the total deaths from specified causes in these towns during the year, 3·2 per cent. were due to this cause, a rate ranging from 6·2 in Leith and 4·6 in Glasgow, to 0·1 in Aberdeen.

Deaths from diarrheal diseases, including those registered as due to diarrhoea, infective enteritis, enteritis, and gastro-enteritis, numbered 908. They are 528 fewer than in the previous year, and equal to a death-rate of 51 per 100,000—a rate which is 30 lower than that of the previous year. This death-rate ranged from 88 in Dundee to 31 in Edinburgh. In Glasgow it was 56; in Greenock, 51; in Leith, 47; in Perth, 43; in Aberdeen, 39; and in Paisley, 37. The above 908 deaths include 103 attributed to epidemic diarrhoea or infective enteritis, 270 to diarrhoea not otherwise specified, 254 to enteritis not described as infective, and 281 to gastro-enteritis.

Deaths from tubercle numbered 4265. They are 223 more than in the previous year, and are equal to a death-rate of 237 per 100,000. They amounted to 13·6 per cent. of the total specified causes of death for the year. The death-rate from tuberculous diseases ranged from 280 in Dundee

TABLE XIII.—Deaths from Cerebro-spinal Meningitis in Eight of the Principal Towns of Scotland, in each Month of the Year 1907, with the Totals for the Year 1906.

| TOWNS. | Total 1907. | Jan. | Feb. | March. | April. | May. | June. | July. | Aug. | Sept. | Oct. | Nov. | Dec. | Total 1906. |

| Glasgow . . . | 711 | 66 | 111 | 135 | 112 | 96 | 52 | 37 | 30 | 29 | 19 | 14 | 10 | 147 |
| Edinburgh . . | 148 | 5 | 13 | 19 | 38 | 14 | 21 | 14 | 5 | 8 | 6 | 2 | 3 | 3 |
| Dundee . . . | 30 | .. | 3 | 2 | 6 | 8 | 1 | 1 | 4 | 4 | .. | 1 | .. | 1 |
| Aberdeen . . . | 3 | .. | .. | .. | .. | .. | .. | .. | 1 | 1 | .. | .. | 1 | 1 |
| Paisley . . . | 30 | 1 | 8 | 5 | .. | 5 | 2 | 1 | 3 | 1 | 1 | 1 | 2 | 4 |
| Leith | 86 | 2 | 5 | 16 | 18 | 19 | 6 | 8 | 3 | 1 | 2 | 2 | 4 | .. |
| Greenock . . . | 9 | .. | .. | 2 | 3 | 1 | .. | .. | 1 | .. | 1 | 1 | .. | .. |
| Perth | 1 | .. | .. | .. | .. | .. | .. | .. | 1 | .. | .. | .. | .. | .. |
| Total Eight Towns . | 1018 | 74 | 140 | 179 | 177 | 143 | 82 | 61 | 48 | 44 | 29 | 21 | 20 | 156 |
| Death-rate per 1000 of Population . . . | 0·56 | 0·48 | 1·01 | 1·16 | 1·19 | 0·93 | 0·55 | 0·40 | 0·31 | 0·30 | 0·19 | 0·14 | 0·13 | 0·09 |

to 181 in Aberdeen. In Perth it was 262; in Greenock, 261; in Glasgow, 256; in Paisley, 221; in Leith, 207; and in Edinburgh, 200. Of the above 4265 deaths, 2636 were ascribed to phthisis, 751 to tuberculous meningitis, 373 to tuberculous peritonitis, 84 to tabes mesenterica, 2 to lupus, 246 to general tuberculosis, and 173 to other forms of tuberculous disease. The death-rate from phthisis for the eight towns combined was 146 per 100,000. In Dundee it was 177; in Perth, 164; in Glasgow, 156; in Greenock, 155; in Leith, 141; in Paisley, 136; in Edinburgh, 125; and in Aberdeen, 111. The death-rate of the year from all tuberculous disease is 9 higher than in 1906, and that from phthisis is 2 higher than in that year.

Deaths ascribed to malignant disease numbered 1818. They are 49 more than in the previous year, and are equal to a death-rate of 101 per 100,000, a rate which is 1 higher than in the previous year. The death-rate from this cause ranged from 127 in Edinburgh and 113 in Aberdeen, to 68 in Leith and 74 in Paisley.

Pneumonia was the ascribed cause of 3217 deaths during the year, which number is 180 more than in the previous year, and equal to a death-rate of 178 per 100,000, a rate which is 7 higher than in the previous year. The death-rate from this cause ranged from 212 in Glasgow to 112

TABLE XIIb.—Proportion of Deaths from different Diseases to the Total Deaths from Specified Causes in each of Eight of the Principal Towns of Scotland during the Year 1907.

| | Proportion of Deaths to every 10,000 Specified Causes of Death in | | | | | | | | |

| Old Age | 286 | 185 | 276 | 250 | 325 | 351 | 151 | 294 | 498 |

in Perth. In Greenock it was 192; in Leith, 170; in Dundee, 157; in Edinburgh, 151; in Paisley, 138; and in Aberdeen, 126. Deaths from pneumonia amounted to 10·2 per cent. of the total deaths of the year.

Deaths from bronchitis numbered 2286. They are 111 more than in the previous year, and are equal to a death-rate of 127 per 100,000, a rate which is 5 higher than in the previous year. The death-rate from this cause ranged from 175 in Dundee to 92 in Edinburgh. In Paisley this death-rate was 165; in Glasgow, 133; in Perth, 124; in Greenock, 123; in Leith, 121; and in Aberdeen, 107.

Deaths from diseases of the heart numbered 2869, and constituted 9·1 per cent. of the total deaths. Those from apoplexies numbered 1715, and constituted 5·5 per cent. of the total.

Deaths from puerperal septic conditions and from diseases and accidents of pregnancy and childbirth numbered 248. They are 8 fewer than in the previous year, and equal to a child-bed mortality of 52 per 10,000 living children born, a rate which is the same as in the previous year. Of these deaths 61 were ascribed to puerperal septicaemia, 2 to puerperal pyæmia, 3 to phlegmasia alba dolens, 28 to puerperal fever, 10 to abortion, 1 to puerperal mania, 38 to puerperal convulsions, 28 to placenta prævia and flooding, and 77 to other accidents of pregnancy and childbirth. The death-rate from these causes ranged from 114 per 10,000 births in Perth to 22 in Leith. In Glasgow this rate was 60; in Edinburgh, 55; in Greenock, 51; in Dundee, 37; in Paisley, 34; and in Aberdeen, 31.

Deaths from violent causes numbered 1228. They are 62 fewer than in the previous year, and are equal to a death-rate of 68 per 100,000, a rate which is 5 less than in the previous year. Of the 1228 deaths, 1128 were ascribed to accidental causes, 93 to suicide, and 7 to homicide. Of the accidental deaths, 205 were due to burns and scalds, 126 to drowning, 63 to overlying, 54 to poisons and poisonous vapours, 30 to accidents connected with vehicles and horses, and the remainder to other or unspecified causes. Of the 93 suicides, 36 were by hanging, 27 by cutting, 9 by poison, 8 by drowning, 5 by precipitation, 3 on the railways, 3 by gunshot, and 2 by unstated method. The death-rate from violent causes ranged from 76 per 100,000 in Glasgow to 43 in Paisley. In Dundee it was 74; in Perth, 72; in Greenock, 68; in Edinburgh, 65; in Leith, 62; and in Aberdeen, 45.

Among the persons whose deaths were registered during the year in the eight towns there were 114 aged 90 years and over. Of them 35 were men and 79 women. The oldest were an unmarried milliner and a widow, each aged 100.

MARRIAGES IN THE EIGHT TOWNS.

Marriages registered in the eight towns during the year numbered 15,461, a number which is 63 fewer than that of the previous year, but is 462 more than the average number of the previous five years, and 514 more than the average number of the previous ten years. The equivalent marriage-rate is 8·5 per thousand, a rate which is 0·2 less than that of the previous year, 0·2 less than the mean of the marriage-rates of the previous five years, and 0·5 less than the mean of the marriage-rates of the previous ten years. In the towns the marriage-rate ranged from 8·9 in Edinburgh to 6·5 in Leith. In Glasgow it was 8·8; in Aberdeen, 8·4; in Dundee, 8·3; in Perth, 8·3; in Paisley, 8·1; and in Greenock, 6·9. In Edinburgh

the marriage-rate was the same as in 1906; in Aberdeen, Paisley, and Perth the marriage-rate was higher than in that year; but in Glasgow, Dundee, Leith, and Greenock it was lower than in that year.

III.—WEATHER AND ITS INFLUENCE ON MORTALITY.

The remarks regarding the weather made in this section of the report are based on notes made by Mr. Andrew Watt, M.A., secretary of the Scottish Meteorological Society, and published in the Monthly and Quarterly Reports of the Registrar-General.

The year 1907 was characterised by a mean temperature of slightly less than the average mean temperature of the period 1855 to 1905, and by a rainfall of more than average amount. The mean temperature of the year was $46^{\circ}\cdot6$, which is $0^{\circ}\cdot1$ more than the mean of the mean temperatures of the previous ten years, but $0^{\circ}\cdot3$ less than the mean of the mean temperatures of the years 1855 to 1905. The total rainfall of the year was 39·63 inches, an amount which is 1·56 more than that of the previous year, 1·08 less than the mean of the rainfalls of the previous ten years, but 4·15 more than the mean of the rainfalls of the years 1855 to 1905.

The mean temperature in February, and in the months May to August, was less than average, while in January, March, and from September to the end of the year it was greater than average. The mean rainfall in January, February, July, September, and November was less than the average of those months, but in the remaining months it was more than average.

Compared with the previous year, this year had a slightly lower mean temperature, a higher rainfall, and a smaller mean of maximum temperatures in the summer months.

These have been the weather conditions of a year characterised by a low death-rate, a death-rate which, had there not been epidemics of hooping-cough and cerebro-spinal meningitis, would probably have been the lowest ever recorded. The excess of deaths in the eight towns this year over those of last year (the year with the smallest recorded death-rate in those eight towns) was only 1059, while the excess of deaths due to cerebro-spinal meningitis was 862, and to the epidemic of hooping-cough 782, which together exceed the excess of the total deaths. Deaths from pneumonia and bronchitis, though slightly more than in the previous year, show no marked increase. Deaths from diarrhoeas are decidedly less in this than in the previous year (913 as against 1440 in the previous year), and this may be due to the cooler and wetter character of the summer months.

The following are notes of the weather of each month of the year:—

January was characterised by an exceptionally high mean pressure; a slightly high mean temperature, with a mean daily range all but the average; a low mean rainfall; a large excess of winds from W. and N.W.

February was characterised by an average mean pressure; a low mean temperature, with a high mean daily range; a rather low mean rainfall; an excess of winds from S.W., and also from N.W. and N.

March was characterised by a high mean pressure; a high mean temperature, with a large mean daily range; a rather high mean rainfall; a large excess of winds from S.W. and W.

April was characterised by a low mean pressure; an average mean temperature, with a slightly low mean daily range; an average mean rainfall; an excess of winds from N. and from S.E.

May was characterised by a low mean pressure; a low mean temperature, with a very low mean daily range; an extremely high mean rainfall, with a large number of days with rain; an excess of winds from N.E. and E.

TABLE XIII.—Monthly Mortality and Mean Temperature in Scotland during 1907 compared with the Mean of the Ten Years 1891–1900.

| MONTHS. | YEAR 1907. | | | 1891–1900. | |
|-----------------|-------------------|----------------|---|-------------------------------|-------------------|
| | Mean Temperature. | Actual Deaths. | Proportion to 12,000 per annum or 1000 per month. | Monthly Proportion of Deaths. | Mean Temperature. |
| January . . . | 38°·2 | 7,872 | 1,223 | 1,163 | 36°·8 |
| February . . . | 36°·6 | 7,345 | 1,141 | 1,087 | 37°·4 |
| March . . . | 42°·1 | 7,418 | 1,152 | 1,155 | 39°·7 |
| April . . . | 43°·7 | 7,385 | 1,147 | 1,043 | 44°·7 |
| May . . . | 47°·5 | 6,906 | 1,072 | 1,005 | 48°·8 |
| June . . . | 51°·1 | 5,828 | 905 | 929 | 55°·2 |
| July . . . | 55°·4 | 5,786 | 899 | 892 | 57°·3 |
| August . . . | 53°·6 | 5,030 | 781 | 898 | 57°·1 |
| September . . . | 53°·5 | 4,905 | 762 | 854 | 53°·0 |
| October . . . | 47°·4 | 5,515 | 856 | 907 | 45°·8 |
| November . . . | 41°·5 | 5,951 | 924 | 982 | 42°·4 |
| December . . . | 38°·5 | 7,326 | 1,138 | 1,085 | 38°·7 |
| YEAR . . . | 45°·8 | 77,267 | 12,000 | 12,000 | 46°·4 |

June was characterised by a remarkably low mean pressure; a very low mean temperature, with a very low mean daily range; a very high mean rainfall, with a notably large number of days with rain; a considerable excess of Westerly winds.

TABLE XIV.—Meteorology of Scotland for 1907, deduced from Observations made at 60 Stations of the Meteorological Society of Scotland, the particulars for each of the Stations having been published in the Quarterly Reports of the Registrar-General; also the Number of Births, Deaths, and Marriages registered during each Month of the Year 1907.

FORTY-THIRD ANNUAL REPORT

ON THE

VACCINATION OF CHILDREN

BORN IN SCOTLAND IN 1906.

Since the presentation of the Forty-second Annual Report on the Vaccination of Children, the Vaccination (Scotland) Act, 1907, has become law; and to show the effects of that Act on the numbers of children vaccinated, it has been necessary to add a new column to the tables of this report, stating the number of children unvaccinated by reason of the conscientious objections of their parents. The full effect of that Act cannot yet be ascertained, as the Act was passed on 28th August, 1907, and affected comparatively few of the children born in 1906, the year dealt with in this report.

TABLE XIX.—VACCINATIONS in SCOTLAND, 1896-1906, and Proportion to the Births each Year.

| Years. | | Success-fully Vaccinated. | Vaccination Postponed. | Insusceptible of Vaccination. | | | Died before Vaccination. | Statutory Declarations of Conscientious Objection. | Removed from District before Vaccination, or otherwise unaccounted for. | TOTAL BIRTHS. |

The number of living children whose births were registered in Scotland during the year ending 31st December, 1906, was 132,056. Of them, 109,246 were reported to the Registrars as having been successfully vaccinated; 3105 as having their vaccination postponed by reason of ill-health; 1094 as being insusceptible to vaccination; 12,592 as being dead before vaccination; 253 as unvaccinated on account of the con-

TABLE XX.—VACCINATIONS in SCOTLAND, 1896–1906, deducting from the Births those who died before they could be Vaccinated, and giving the Proportion of the Vaccinated to the surviving Births of each year.

* Including such as were certified as Insusceptible of Vaccine Disease "on the ground of previous successful vaccination," the children having been vaccinated by persons unauthorised to grant certificates.

† At the end of the year following that of registration of birth.

1906, and to 91·45 per cent. of the total children registered in 1906 and alive at the time of compulsory vaccination. The former rate is 1·84 less than the percentage of children successfully vaccinated in 1905, and 1·56 less than the mean of those percentages of the previous ten years. The latter rate is 1·74 less than the rate for 1905, 2·09 less than the mean of the rates of the previous ten years, and is the smallest percentage of surviving children reported as successfully vaccinated in any year in Scotland since the passing of the Vaccination Act, 26 & 27 Vict. cap. 108.

The number of children born in 1906 and reported to have died before the time of compulsory vaccination is 12,592, or 9·54 per cent. of the total born. This number is 424 more than the number of those dying before vaccination in the previous year, but 399 less than the mean of the numbers dying before vaccination in the previous ten years. The percentage of the total children dying before vaccination is 0·28 more than in the previous year, but 0·35 less than the mean of the percentages of the previous ten years.

The number of children whose vaccination was postponed by medical certificate for reasons of ill-health was 3105; they are 274 more than in the previous year, and 283 more than the average number during the previous ten years. These children amount to 2·35 per cent. of the total children, a rate which is 0·20 more than that of the previous year, and the same amount more than the mean of the rates of the ten preceding years.

The total number of children reported as insusceptible to vaccination was 1094, which is 182 fewer than in the previous year. Of these children 563 were reported to be insusceptible by reason of previous vaccination, 531 by reason of constitutional insusceptibility, and none as insusceptible on account of having had small-pox.

The number of cases reported as constitutionally insusceptible to vaccination, 531, are 20 more than in the previous year, but 29 fewer than the average number during the preceding ten years. They amount to 0·40 per cent. of the total children born, and to 0·44 per cent. of the children surviving at the time of compulsory vaccination. These insusceptibles amount to 1 in 249 of the total children whose births were registered in 1906. In the eight Principal Towns this rate ranged from 1 in 110 in Dundee to 1 in 1570 in Aberdeen. In Edinburgh it was 1 in 150;

TABLE XXII.—Smallpox Deaths in Eight of the Principal Towns of Scotland at different Ages in 1907, also during the Ten Years 1895–1904, 1885–1894, 1875–1884, and 1865–1874, compared with those in the same towns for the Ten Years before the Vaccination Act came into operation, viz., 1855–1864.

| 60 and above. | .. | .. | 20 | 4·32 | 9 | 4·84 | 1 | 0·96 | 40 | 1·09 | 6 | 0·11 |
| Total | 1 | 100·00 | 463 | 100·00 | 186 | 100·00 | 104 | 100·00 | 3657 | 100·00 | 5415 | 100·00 |

in Leith, 1 in 184; in Paisley, 1 in 208; in Greenock, 1 in 228; in Glasgow, 1 in 238; and in Perth, 1 in 386. High rates of constitutional insusceptibility are reported from the Island of Coll, where out of 7 children 4 were reported to be insusceptible; from Killean and Kilchenzie, where 1 in 7 was reported to be insusceptible; from Macduff, 1 in 16; from Monikie, 1 in 17; from Fauldhouse, 1 in 35; from Jedburgh, 1 in 39; from New Monkland, 1 in 75; and from Partick, 1 in 86. No children were reported as insusceptible to vaccination in four counties--Caithness, Sutherland, Nairn, and Bute.

The number reported to be insusceptible on account of previous vaccination was 563. If these be added to those reported as successfully vaccinated the rate of successful vaccination amounts to 83·15 per cent. of the total children born, and to 91·92 per cent. of the total children surviving at the time of compulsory vaccination.

The number of children reported to be removed from the district of registration, or to be otherwise unaccounted for, was 5766, which is 1752 more than in the previous year, and 1982 more than the average number unaccounted for during the previous ten years. These children amount to 4·37 per cent. of the total children born in 1906, which rate is 1·32 more than that of the previous year, and 1·49 more than the mean of the rates of the previous ten years.

The number of children born in 1906 and unvaccinated at the end of 1907 on account of the conscientious objection of their parents was 253, or 0·19 per cent. of the total children born in that year. As pointed out above, this figure is no indication of the full effects of the Vaccination (Scotland) Act, 1907, as the operation of that Act applied to a small portion only of the children dealt with in this report, namely, those born in 1906 and still unvaccinated at 28th August, 1907.

The principal facts regarding the administration of the Vaccination Acts in Scotland since these Acts came into force are recapitulated in Table XXIA. In that Table it may be seen that the proportion of children successfully vaccinated in Scotland in the year now under consideration is the smallest yet recorded, that the proportion of children unaccounted for as regards vaccination is the largest yet recorded, and that a proportion of children unvaccinated by reason of the conscientious objection of their parents is recorded for the first time.

I have the honour to be,

SIR,

Your most obedient Servant,

JAMES C. DUNLOP.

24th February 1908.

I.—BIRTHS

REGISTERED IN SCOTLAND DURING EACH MONTH OF THE YEAR 1907.

N.B.—Districts containing Parliamentary and Royal Burghs are printed in capitals, thus—EDINBURGH. Districts containing Police Burghs or Towns of 2000 Inhabitants and upwards are printed in small capitals, thus—CARLUKE. An asterisk "*" is prefixed to those Districts which have different names from the Parishes in which they are situated, or which comprise more, or parts of more than one Parish. The component parts of these Districts will be found on page 58.

† Vaccination Return not received.

APPENDIX

VACCINATIONS, 1906.

EXTRACTS FROM THE REGISTRARS' NOTES RELATIVE TO THE WORKING OF THE VACCINATION ACT.

I.—NORTHERN DIVISION.

2. ÖRKNEY.

23. ORPHIR.—The child whose vaccination has been postponed has been twice vaccinated without success.

II. NORTH-WESTERN DIVISION.

5. ROSS AND CROMARTY.

Mainland.

81. ROSSKEEN.—Since the month of October the schools in the parish have been closed owing to an outbreak of Measles and Hooping Cough, which accounts for the large number of postponements.

Insular.

89. UIG.—Of the children whose cases are returned in col. 8, one left the country before vaccination, in another case Vaccination Certificate of Postponement was received, but period has expired, and nine have not been vaccinated, their guardians not being considered defaulters owing to the difficulty of their being reached by the public vaccinator.

6. INVERNESS.

Mainland.

92½. CANNICH.—In this widely-scattered district some families are 39 miles distant from a doctor, others 34 miles. By arrangement a doctor attends here once a year for the purpose of vaccination, but notwithstanding, some families, being resident 23 miles away, find it difficult to bring their children here unless the weather is favourable, especially as for half the way there are merely bridle tracks.

98. INVERNESS.—During 1907 there have been epidemics of Hooping Cough and Measles in Inverness, and these, combined with the suspension of defaulters' notices since September, have had an effect on vaccination.

Insular.

108. BARRA.—Three of the five cases returned in col. 8 are of children who reside in Mingally, an island 10 miles from the main island.

111 (1). NORTH HARRIS.—Vaccination has been retarded by the death of the vaccinator. His successor has now been appointed.

113. NORTH UIST.—Hooping Cough has been prevalent in the parish during the latter part of the year.

118 (1). BENEICULA.—The child whose case is returned in col. 8 will be vaccinated at the earliest opportunity.

III. NORTH-EASTERN DIVISION.

8. ELGIN.

130. DRAINIE.—Two of the cases returned in col. 8 are of persons born before the passing of the Vaccination Act, whose births had been neglected to be registered at the proper time.

9. BANFF.

159. KEITH.—The number of deaths before vaccination seems to be very high, notwithstanding the fact that there was no epidemic of any kind in the district.

10. ABERDEEN.

168 (2). ST. MACHAR.—In 67 of the 114 cases entered in col. 8, Certificates of Postponement, expiring prior to 31st December, 1907, had been received.

IV. EAST-MIDLAND DIVISION.

12. FORFAR.

282 (5). LOCHEE.—The large number (144) unaccounted for is to some extent the result of carelessness on the part of parents, consequent on the passing of the new Vaccination Act.

13. PERTH.

330. AUCHTERGAVERN.—The postponements are practically all due to the prevalence of Eczema, which seems to be increasing.

14. FIFE.

426. DYSART.—The number of cases entered in col. 8 is due to the usual notice not being sent to defaulting parents.

459 (1). WEMYSS.—Failure to pay the medical attendant his fee for the confinement has a good deal to do with outstanding vaccination cases in this district.

 VI. SOUTH-WESTERN DIVISION.

22. AYR.

589. DREGHORN.—In 14 of the 17 cases entered in col. 8, Certificates of Postponement had been received for periods which expired prior to 31st December.

610. PATNA.—The case returned in col. 8 was that of the child of 'travelling circus people.

23. LANARK.

624. BLANTYRE.—The increase in col. 8 is due to there being no defaulters' list furnished to the Parish Council for the six months ending 30th September last.

644 (9). KELVIN.—The "Still Postponed" cases are less than half, and the "Unaccounted for" cases are nearly double, the corresponding numbers for 1905. The bad results in both cases are due to the Registrar not being at liberty to send any reminder to the parents.

 VII. SOUTH-EASTERN DIVISION.

25. EDINBURGH.

674. BORTHWICK.—The five cases returned in col. 8 have all been vaccinated, but certificates have not yet been received.

 VIII. SOUTHERN DIVISION.

31. DUMFRIES.

882. TROQUEER.—The number "Unaccounted for" is abnormally high owing to the half-yearly List of Defaulters not having been transmitted to the Inspector of Poor.

CONSTITUTION OF THE DISTRICTS DISTINGUISHED IN THE PRECEDING TABLES
BY AN ASTERISK (*).

| No. | Districts. | Component Parts (Parishes). |
|------------------------------|--------------------------------------|---|
| 2. Orkney. | | |
| 13 | Birsay | Part of Harray and Birsay. |
| 14 | Deerness | Part of St Andrews and Deerness. |
| 18 | Harray | Part of Harray and Birsay. |
| 22 | North Ronaldshay | Part of Cross and Burness. |
| 25 | St Andrews | Part of St Andrews and Deerness. |
| 26 | Sanday | Lady, and part of Cross and Burness |
| 3. Caithness. | | |
| 37b | Keiss | Parts of Canisbay and Wick. |
| 5. Ross and Cromarty. | | |
| 58 | Applecross | (1) Part of Applecross; (2) Remainder of Applecross and part of Gairloch. |
| 59b | Carnoch | Parts of Contin and Urray. |
| 86b | Carloway | Parts of Barvas and Uig. |
| 87 | Lochs | Lochs, and part of Uig. |
| 6. Inverness. | | |
| 92b | Cannich | Parts of Kilmorack and Kiltarlity. |
| 112 | Kilmuir | (1) Part of Kilmuir; (2) Remainder of Kilmuir, and part of Snizort. |
| 8. Elgin. | | |
| 135 | Elgin | Elgin, and parts of New Spynie and St Andrews-Lhanbryde. |
| 9. Banff. | | |
| 152 | Enzie | Parts of Bellie and Rathven. |
| 155b | Glenrines | Parts of Aberlour and Mortlach. |
| 167 | Seafield | Parts of Cullen and Rathven. |
| 10. Aberdeen. | | |
| 171b | Ardallie | Parts of Cruden, Ellon, Longside, and Old Deer. |
| 210b | Kinmonth | Parts of Crimond, Longside, Lonmay, Old Deer, and Strichen. |

| | | Brodieck, . . . 553 | | |

* The actual number of Districts is 1078—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 7 and 18 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place compound names in the order in which they are pronounced.
